## **DockPro 3500**

### **High Intensity LED Dock Light**

#### **FEATURES & SPECIFICATIONS**

##### **INTENDED USE**

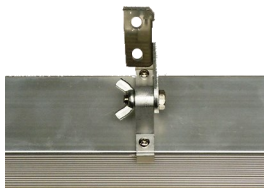

Above water lighting for Docks, Piers, Slips, Decks, Walkways, Landscape Lighting and more!

##### **CONSTRUCTION**

- All Aluminum, powder coated construction with an **IP66** rating for outdoor use. The unit is **45.5"x2.5"x2"** and uses **(44) High Intensity 1-watt LEDs**.
- **60-degree** reflectors provide a more focused output of light.
- Designed to illuminate the water immediately under or in front of the dock.
- Mounting Bracket included.

##### **ELECTRICAL**

- **120VAC** input
- Internal 44W, 36VDC driver, 0.36 amp draw
- **25'** power-cord with a standard 3-prong US style plug
- Available in Green, Blue or White.

The **2-piece Mounting Bracket** makes installation quick and easy. Attach the outer brackets on the face of the dock, loosen the screws on the bracket which is attached to the light and slide them so they align with the outer bracket. Tighten screw on inner bracket, insert bolt through bracket holes, add washers and wingnut, adjust to desired angle, and tighten wingnut.

This Dock Light is for Above Water Use Only and should always be plugged into a grounded, GFCI Protected outlet.
